Cholera in Cebu and Bohol.

MANILA, P. I., August 13, 1902.

SIR: I have the honor to transmit for your information report of Asst. Surg. H. A. Stansfield on the cholera situation in Cebu.

The epidemic is serious in Cebu and has quickly spread to other towns in the island, also to Bohol, and to-day's report shows that a number of towns in the latter island are seriously infected. As already stated, no

attempt at land quarantine is made and people are free to leave infected towns whenever they desire to do so. They take bancas on the beach for places in the adjoining island, and since the enforcement of quarantine in many of the numerous pueblos on the beach rests with the presidente, there is no restriction whatever, and the disease spreads in spite of all efforts of maritime quarantine.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL.

[Inclosure.]

CEBU, P. I., August 7, 1902.

SIR: I have the honor to transmit cholera report for this city since July 25, 1902, as follows:

Date.	Cases.	Deaths.	Date.	Cases.	Deaths.
July 26	13	8	August 2	39	18
July 27	16	9	August 3	29	13
July 28	14	9	August 4	37	26
July 29	14	10	August 5	25	17
July 30	49	25	August 6	24	12
July 31	33	21			
August 1	28	15	Total	321	183

By nationalities—Americans, 1 case and 1 death; Filipinos, 320 cases and 182 deaths.

The situation here is very serious. There is still no quarantine on the land side of town. Cases are allowed to remain in their houses or go to the hospital. There are, I am informed, local laws by which this could be stopped, but they are not enforced. It is the general opinion here that there is much more cholera than reported, as by the system of allowing cases to remain in houses no definite account can be kept of them. The people object, as a rule, to going to the hospital, and very strongly. Reports have been rife among the Filipinos that all going to the hospital are poisoned. This is, of course, due to their dense ignorance. Also reports have been circulated that cholera is not present here, but that the wells have been poisoned. This was first blamed on Filipinos, later on Chinamen, and now the Americans are accused.

I will forward reports by each mail, and when mails are far apart will telegraph.

Respectfully,

H. A. STANSFIELD,
Assistant Surgeon.

P. A. Surg. J. C. PERRY,
Chief Quarantine Officer for the Philippine Islands.

Reports on outgoing quarantine at Manila.

MANILA, P. I., August 13, 1902.

SIR: I have the honor to transmit herewith report of the outgoing quarantine at this station for the week ended July 12, 1902.

Respectfully,

J. C. PERRY,
Passed Assistant Surgeon,
Chief Quarantine Officer for the Philippine Islands.

The SURGEON-GENERAL.

[Inclosure.]

Weekly report of outgoing quarantine at Manila, P. I., instituted for protection of other Philippine ports on account of the prevalence of cholera in Manila, week ended July 12, 1902.

Number of vessels remaining in quarantine from last week (a)	25
Number of vessels entering quarantine during the week	42
Number of vessels discharged from quarantine	47

a Vessels are held in quarantine five days before being allowed to sail and inspected daily.
